Experience

FP&Automation

Power BI Developer | Consultant

Oct 2024 - Present

- Power BI & Data Analytics: Developed interactive Power BI dashboards, leveraging SQL for data manipulation, reporting, and cross-departmental decision-making.
- Automated Accounting System: Implemented Acterys with Power BI to streamline financial consolidation, real-time reporting, and data reconciliation, reducing manual effort and errors.
- Enhanced Financial Insights: Developed dynamic dashboards and forecasting models, leveraging Acterys' write-back capabilities for improved financial planning and decision-making.
- ADF and Fabric data integration.

Willis Towers Watson

Associate

Jun 2019 - Aug 2024

- Developed interactive Power BI dashboards, and utilized VBA and SQL for data manipulation and reporting, driving data-driven decisions across departments.
- Tools SME & Member of Tools Development Team
- Conducted technical reviews and audits for colleagues in Mumbai and Manila, ensuring data accuracy and compliance across teams.
- Financial Modeling & Analysis: Built and maintained forecasting models (FPA, PUT, IBNR, FBS), conducted variance analysis, and provided insights for performance improvement.
- Process Automation & Tools Development: Automated manual processes using Microsoft Power Platform (PowerApps, Power Automate, Power BI) and conducted technical reviews to ensure data accuracy and compliance.
